ALIENTECH®

KESS3

ECM TITANIUM

POWERGATE 3+

ACADEMY

KESS3

ALIENTECH®

All in one tool: ECU and TCU programming via OBD, Bench and Boot mode.
Thanks to thirty years of experience and nearly three years of development, KESS3 is the most advanced engineering achievement ever conceived in the Chiptuning industry.
KESS3 has been developed to provide everyone with a quick and simple interface to any engine control unit and automatic gearbox on the market.
New microprocessor, latest generation I/O interfaces, new built-in sensors and high-performance EEPROM and FLASH memories are the main features of KESS3.

KESS3 - SUBSCRIPTION AND SERVICES

ALIENTECH®

The activation of new protocols, the virtual reading service, web services related to the protocol functioning and technical assistance are services available with an active subscription.
The subscription is unique and there is no distinction between the types of vehicles, or the communication methods purchased.
The only discriminating factor is the tool version and the subscription length.

ECM TITANIUM

ALIENTECH®

The performance configurator for motor vehicles that you can use wherever and whenever you want.
ECM TITANIUM is the recalibration software developed by Alientech, which allows you to independently view and modify the management parameters of any original ECU and TCU calibration file. With different working views (2D, 3D, TAB and Driver), ECM Titanium allows you to act not only for performance enhancement but also for ECU repairing and cloning.
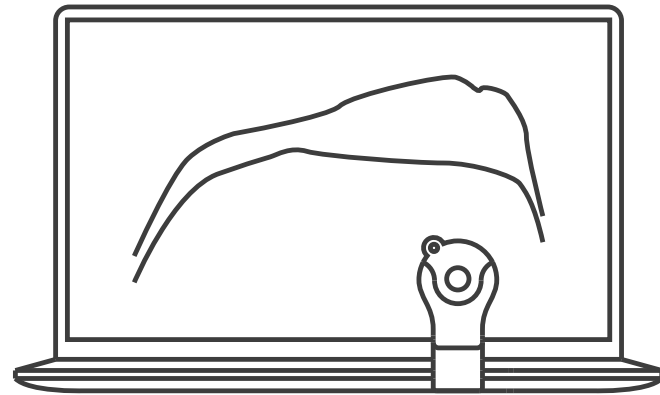

VERSION

DRIVER MAKER

SUBSCRIPTION AND CREDITS

ECM TITANIUM - VERSION

ALIENTECH®

ECM TITANIUM Full.
A comprehensive solution in which you have dedicated technical assistance, up to 100 drivers per day available for download for cars, bikes, tractors, trucks, and boats.
You can request Original Files and New Drivers, update the drivers list and the software.If you choose the Full version, you have everything at your disposal and you are free to remap without restriction.

ECM TITANIUM Credits.
Activate your ECM TITANIUM software with Credits and choose the operations that interest you the most. Do you need a motorbike or gearbox driver? Use some of your credits only! You maintain control over what you do and, depending on your needs, you can expand your "credit package".

POWERGATE3+

**Become the world's best-known tuner.**
Powergate3+ is the tool dedicated to the end user that allows to remap the engine control unit of the vehicle at any time. Thanks to your modified files, uploaded remotely, the user will be able to boost the performance of the vehicle, in complete autonomy and safety, directly from the OBD socket.

DECODER

VERSION

POWERGATE3+ DECODER

ALIENTECH®
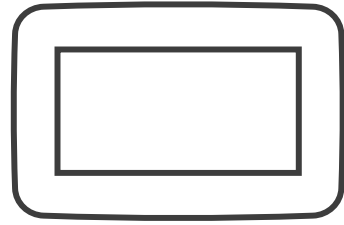

Powergate3+ is the ECU programming unit that you can configure and customize with your modified files.
The tuner purchases a single Decoder which can be used to configure countless User tools which are preloaded with their modified files.

Powergate3+ Decoder
The tool that allows you to configure all the Powergate3+ User to sell to your customers and to associate them to your customer code.
All the files you modified and uploaded to the device are encoded to protect your work and you have a modified file internal database.
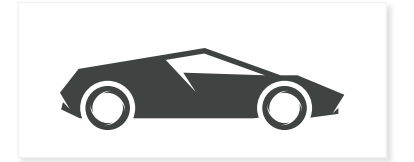

Powergate3+ User
The tool which is sent to the final customer.
It contains the Original File of the ECU and the modified maps (up to 5 different levels of elaboration) that the customer can write on its vehicles.

BMW Motorrad Bikes Euro5

Code	Product	Price (EUR)
1400P40023	User Unit for BMW Motorrad Bikes Euro5 (1-49x)	145,00 €
1400P40023	User Unit for BMW Motorrad Bikes Euro5 (50+)	130,00 €

*1400P3MF15 - OBD Standard Cable included

Honda Bikes

Code	Product	Price (EUR)
1400P40024	User Unit for Honda Bikes (1-49x)	145,00 €
1400P40024	User Unit for Honda Bikes (50+)	130,00 €

*1400P3MF18 - Honda Cable included

POWERGATE3+ USER

ALIENTECH®
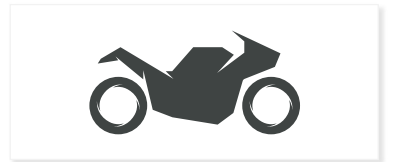

Husqvarna Bikes

Code	Product	Price (EUR)
1400P40026	User Unit for Husqvarna Bikes (1-49x)	145,00 €
1400P40026	User Unit for Husqvarna Bikes (50+)	130,00 €

*1400P3MF06 - Husqvarna Cable included

Yamaha Bikes

Code	Product	Price (EUR)
1400P40027	User Unit for Yamaha Bikes (1-49x)	145,00 €
1400P40027	User Unit for Yamaha Bikes (50+)	130,00 €

*1400P3MF19 - Yamaha Cable included

Benelli Bikes

Code	Product	Price (EUR)
1400P40028	User Unit for Benelli Bikes (1-49x)	145,00 €
1400P40028	User Unit for Benelli Bikes (50+)	130,00 €

*1400P3MF20 - Benelli Cable included

POWERGATE3+ ACCESSORIES

ALIENTECH®

Bike - ATV & UTV
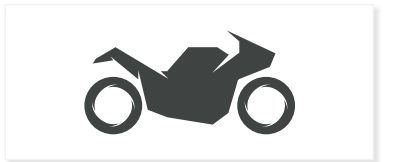

Code	Product	Price (EUR)
1400P3MF05	Cable for Italian Bikes VDO	39,00 €
1400P3MF06	Cable for KTM - Husqvarna Bikes	39,00 €
1400P3MF09	Cable for Italian Bikes Marelli	49,00 €
1400P3MF10	Cable for Harley-Davidson Bikes	49,00 €
1400P3MF12	Cable for MV Augusta Bikes	49,00 €
1400P3MF13	Adapter Cable for Harley-Davidson Bikes older version	25,00 €
1400P3MF14	Cable for Yamaha T-Max Bikes	49,00 €
1400P3MF16	Cable for BMW Motorrad Bikes Euro5	49,00 €
1400P3MF18	Cable for Honda Bikes	49,00 €
1400P3MF19	Cable for Yamaha Bikes	49,00 €
1400P3MF20	Cable for Benelli Bikes	49,00 €
1400P3MF21	Cable for Italian Bikes Euro5	49,00 €
1400P3MF22	Cable for Aprilia Bikes Marelli MP11 (RD)	49,00 €

Professional training to beat the competitors.
Alientech Academy is our professional training platform that will allow you, whatever the mode of use (class, virtual and online),
to learn technical and practical know-how about the world of reprogramming, offering your customers the best services.

ECM TITANIUM: HOW TO USE

Thanks to this course you will have the opportunity to deepen your knowledge of the Alientech ECM Titanium software and to understand the operational strategies used by diesel and petrol engine control units.

We will analyze the many systems present in the new generation engines, to understand how and with which maps the ECU controls the performance developed by the vehicle. In addition, you will understand what are the practical procedures and basic techniques to perform remapping of diesel and petrol engines.

DRIVER MAKER: HOW TO USE

This third level course explains the theoretical knowledge and internal file structure used by major ECU manufacturers. You will understand how the original file is stored inside the ECU through the hexadecimal numerical base, how its structure is made in 2D view with the various precisions of usable bits and you will understand what are the various elements that make up the stock file.

In addition to this, there will be the opportunity to learn how to interpret the data in a DAMOS file and the standard map storage structures adopted by the various control unit manufacturers.

You can then get the information you need to enter the correct data with the ECM Titanium Driver Maker plug-in or any other remapping software with similar capabilities, and will put into practice the notions learned thanks to several practical examples with the use of official Alientech software.

MORE INFORMATION ON REMAPPING PETROL ENGINES

This course will allow you to deepen even more your skills for the modification of petrol engine control units and to understand what are any limits present in other units, which do not allow you to unlock the maximum potential of the vehicle.

You will understand how to calculate the maximum possible increment on any stock engine and what specific modification procedures have been applied to some selected practical examples. In addition, we will see how to use the software ECM Titanium for the comparison of original files with different powers.

MORE INFORMATION ON REMAPPING DIESEL ENGINES

This frontal course will allow you to delve even further into your skills for modifying Diesel Engine Control Units and to understand how to avoid various issues such as, for example, torque monitoring.

You will understand how to calculate the maximum possible increment on any stock engine and what specific modification procedures have been applied to some selected practical examples, and then test the modified file created, on the test bench. Finally, we will see how to use the software ECM Titanium for the comparison of original files with different powers.

MORE INFORMATION ON BIKE REMAPPING

This course will allow you to deepen even more your skills for tuning motorcycles engine control units and to better undestand their components logic.

You will learn about engine parameters to be modified and which tuning procedures are applied on some practical examples. Moreover, we will see how to use ECM Titanium software to tune the necessary maps.

ACADEMY

Basic Training

Code	Product	Price (EUR)
CF00570009	Basic Training - Chiptuning basics & Alientech tools	290,00 €
CF00570011	Basic Training - ECM Titanium & Tuning basics	290,00 €

Advanced Training - Car

Code	Product	Price (EUR)
CF00570012	Advanced Training - Petrol mapping	390,00 €
CF00570013	Advanced Training - Diesel mapping	390,00 €
